Blackbird
Embedded Processing Unit

**95 x 125 x 37 mm
(3.7 x 4.9 x 1.5")**

Overview

The Blackbird is a compact, rugged x86 type board-level embedded computer. It has been engineered and tested to meet the military and medical industries' evolving requirements to develop smaller, lighter, and lower power embedded systems while adhering to stringent regulatory standards. The Blackbird is a member of the VersaLogic family of ultra-rugged EPU embedded computers. Using fully integrated COM components, the Blackbird is supplied fully assembled and tested, including heat plate, ready to install in a system. In addition to providing a very compact footprint, it is designed to withstand extreme temperature, impact, and vibration.

The Skylake processor options feature quad- and dual-core CPUs along with Hyper-Threading logic allowing up to 8 simultaneous threads to be executed. The Blackbird provides great performance and I/O features, moderate power consumption (15 to 22 W typical depending on model), and a compact package. The Blackbird provides compatibility with a broad range of standard x86 application development tools for reduced development time.

The on-board Power Management Unit greatly simplifies system power supply requirements. It features a wide input voltage range of 8 to 30 volts so it is fully compatible with 12 or 24V vehicle applications. It also includes reverse voltage protection,

Highlights

- -40° to +85°C operating temperature models
- Trusted Platform Module (TPM) security chip
- Shock & vibration per MIL-STD-202G
- 6th Generation Intel® Core™ "Skylake" processor
  - i7-6822EQ (quad core) or
  - i5-6442EQ (quad core) or
  - i5-6300U (dual core) or
  - i3-6100U (dual core)
- On-board Power Management
  - 8 to 30 volt DC input (12 and 24 volt system compatible
  - Over- and reverse-voltage protection
  - RF noise filtering
  - Transient voltage protection

- A complete x86 embedded computer
- COM Basic size: (95 x 125 x 37 mm)
- Up to 32 GB DDR4 RAM
- Two Gigabit Ethernet
- Two mini DisplayPort and LVDS video outputs
- Three Mini PCIe Sockets
- Two USB 3.0 port, four USB 2.0 ports
- Serial I/O ports, SATA, Digital I/O
- Analog Inputs (8 chan.)
- Analog Outputs (4 chan.)
- HD Audio
- Customization available
- VersaAPI software support

Overview ...continued

over voltage protection, RF noise filtering, and transient voltage protection, to provide enhanced durability and reliability in the field.

Designed and tested for industrial temperature (-40º to +85ºC) operation, the rugged Blackbird also meets MIL-STD-202G specifications for shock and vibration. Latching SATA,

Ethernet, power, and main I/O connectors provide additional ruggedization for use in harsh environments.

Blackbird is compatible with a variety of popular x86 operating systems including Windows, Windows Embedded, Linux, and VxWorks.

COTs modifications are available, even in low OEM quantities. Modifications include conformal coating, BIOS / splash screen configuration, application specific testing, BOM revision locks, custom labeling, etc. ■

Features

1 On-board Power Management

Accepts 8 to 30 volts DC, and provides OVP, reverse polarity protection, RF noise filtering, and transient voltage suppression.

2 High-performance Video

Integrated Intel HD Graphics Gen 9 core supports DirectX 12, OpenGL 4.4, and H.264, MPEG-2 encoding/decoding. Two Mini DisplayPorts (**2a**) and a dual-channel LVDS video output (**2b** *on back side*). LVDS backlight control (**2c**).

3 Network

Two Gigabit Ethernet (GbE) ports. One port with remote boot support.

4 SATA

Two 6 Gb/s SATA ports support bootable SATA hard drives.

5 Mini PCIe Card Sockets

Two full- and one half-sized sockets. Supports Wi-Fi modems, GPS, MIL-STD-1553, Ethernet, flash data storage with auto-detect mSATA flash storage support, and other mini PCIe modules.

6 Industrial I/O

Two USB 3.0 ports (**6a**) and four USB 2.0 ports (**6b**) support keyboard, mouse, and other devices.

Four RS-232/422/485 serial ports (**6c** *on back side*), three 8254 timer/counters, I2C support, and audio output (**6d** *on back side*).

7 Analog + Digital I/O

On-board data acquisition support. Eight multi-range analog inputs, four analog outputs (**7a**), and twenty four 3.3V digital I/O lines (**7b**).

8 SPI Interface

Supports SPI and SPX devices, including low cost analog and digital modules.

9 Trusted Platform Module

On-board TPM security chip can lock out unauthorized hardware and software.

● Intel Core "Skylake" Processor
(not shown)

Up to 2.6 GHz clock rate. Quad- and dual-core options.

● RAM *(not shown)*

Up to 32 GB DDR4 RAM.

● Industrial Temperature Operation

-40° to +85°C operation for harsh environments.

● MIL-STD-202G

Qualified for high shock / vibration environments.

● Software Support

Compatible with a variety of popular x86 operating systems including Windows, Windows Embedded, Linux, and VxWorks.
Tailor Blackbird to Your Exact Requirements

COTS modifications are available in quantities as low as 100 pieces.

- Conformal Coating
- Custom Cabling
- Connector & I/O Changes
- Custom Testing
- Custom Labeling
- BIOS Modifications
- Software and Drivers
- Environmental Screening
- Revision Locks
- Application-Specific Testing

	VL-EPU-4562-xCP-32	12.0W	22.2W	32.4W

Input Voltage	8V – 30V DC
Input Protections	Over-voltage protection. Self resetting when input falls to a safe level. Reverse voltage input protection to -30V. RF noise filtering (900 MHz, 2.5/5 GHz) - Minimum of 30 dB RF attenuation above 100 MHz. Transient voltage protection (inductive kickback / lightning) clamp at ~+60V / -40V - MSL level 1, per J-STD-020, LF maximum peak of 260°C
System Reset & Hardware Monitors	All voltage rails monitored. Watchdog timer with programmable timeout. Push-button sleep, reset, and power.
Regulatory Compliance	RoHS (EU 2015/863), Conflict Minerals compliant.
